

Ball Containment

Keep the Fun on the Court

Ball Containment prevents home and landscape damage caused by runaway sports equipment. Plus, you spend more time practicing shots instead of chasing the ball!

Our unique system uses a UV-resistant soft fence netting that delivers years of attractive protection for your court. The netting and horizontal and vertical framework are designed as temporary structures, as opposed to more costly and permanent chain-link and other fencing.

Standard in 8' height. Custom sizes and shower curtain action available.
